Award winning story.

One freezing evening in New York city people were just coming home from work when suddenly the sky turned black and icy snow started to fall from the sky. Half an hour later there was one to two meter of snow everywhere, there was snow covering cars, shops and buildings. There were major traffic jams. People were screaming and panicking. The storm went on for days and days. The snow just kept on coming and coming. The paths were icy and slippery, the lakes were frozen with thick ice that you could walk on. The air was bitter and nippy. People were wearing layers of warm clothes and jackets to protect themselves. People's feet were sinking into the white ice cold snow. You could see people breathe in the air. The power lines were knocked down and the power was out. The city looked like it was Antarctica. The Statue of Liberty was frozen solid with snow and you could see a big crack down the side of the statue. Finally after weeks and weeks and weeks the horrible snow storm stopped and the big clean-up started.
